GCN'S												
OTTERS												
REPTILES			Sub-optimal			Sub-optimal	Sub-optimal	Sub-optimal		Sub-optimal		
WATER VOLES										Sub-optimal	Sub-optimal	Sub-optimal
CRAYFISH												
					Sub-optimal	Sub-optimal						
BOTANY	Sub-optimal	Sub-optimal									Sub-optimal	Sub-optimal
			Woodlands	Woodlands								

We also undertake surveys for a variety of other species & habitats, plan and carry out mitigation works & conduct EIA's, BREEAM & CSH assessments. Please contact us directly for more information.

This table provides a brief guide to optimal survey times for a variety of habitats and species. Different survey methods may need to be employed throughout the year & many surveys are weather-dependent. Please seek advice from one of our qualified ecologists before scheduling any work.
